ADMINISTRATION
AND FACULTY

T H E P R E S I D E N T

DR. ARCHIE T. KEENE

We who work in the field of science are proud of the accomplishments of our engineers, scientists and research technicians. Today's atomic reactors, guided missiles, rocket propulsion, automation, and medical advancements are dramatic evidence of the scientific intelligence of our age.

Our rectitude appears less worthy. Can our morals, our sense of values, our philosophy of living keep pace with scientific acceleration? Therein lies the answer to our future.

MRS. INEZ M. PONTIUS
Secretary

MR. ROBERT C. RUHL
Dean

A D M I N I S T R A T I O N

MR. C. A. OVERHOLT

DR. HOWARD P. SMITH
Director of Student Industrial Relations

FACULTY

First Row:

CLYDE L. MELTON, Associate Dean in Charge of General Subjects; B.S. McKendree College; B.S.R.E., Indiana Technical College; Graduate Study, University of Illinois and Yale University; formerly Instructor of Radio at Yale University.

GEZA S. GEDEON, General Engineering Subjects; M.E., Doctor of Aeronautical Science, Technical University, Budapest. Awarded Jeremiah Smith Scholarship. Formerly Lecturer in School of Advanced Engineering Studies, Technical University, Budapest; Aircraft Design Engineer, Breguet Aircraft Corporation, Paris, France.

Second Row:

ROBERT MARSHALL, General Engineering Subjects; University of Denver, B.S.Ae.E., Indiana Technical College; Advanced Studies Indiana University.

ROBERT M. RIPPEY, Mathematics and Science; M.A., University of Chicago; Graduate Studies at M.I.T.

Third Row:

LEONARD R. ETTER, Science and Mathematics; B.S.Ch.E., Indiana Technical College M.A. (Physics) Indiana University. Extensive Work in Cosmic Ray Research.

A. WAYNE SHEPHERDSON, Mathematics and Physics; B.S., Huntington College; M.S. (Math.) Michigan State College; formerly Instructor Purdue University and Huntington College.

F A C U L T Y

First Row:

RALPH W. YOUNG, Chairman, Mathematics Program; A.B., Ball State Teachers' College; M.S., Indiana University, M.A., Lehigh University; Ph.D., University of Fla.

GARVER C. WRIGHT, Mathematics and Chemistry; Ball State Teacher's College. Engineer, Joslyn Manufacturing and Supply Company.

Second Row:

ELIZABETH SNOW WOLF (Mrs.), Mathematics; B.S. in Ed., University of Virginia; M.A. in Mathematics, University of North Carolina; Graduate Studies in Physics, University of South Carolina; formerly Instructor of Mathematics, University of North Carolina and University of South Carolina.

FRED H. CRONINGER, Mathematics; B.S., Heidelberg College; M.A., Columbia University.

Third Row:

LEE ROY ULLERY, JR., Physics; B.S., M.S., Notre Dame; Research Physicist, Capehart-Farnsworth Corp.

CHARLES D. DILTS, Chemistry; B.S., Marion Normal College; A.B., Indiana State College; M.A., Indiana University.

F A C U L T Y

First Row:

MARY E. WEIMER, English; A.B., Wittenberg College; M.A., University of Pittsburgh; formerly Instructor Pennsylvania State College.

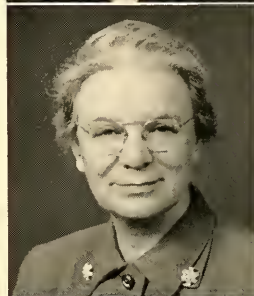

EARL D. MAYER, English; B.A., B.S. in Ed., M.A., Ohio State University.

Second Row:

MARY C. SMITH (Mrs.), English; Oberlin College; A.B., Smith College; M.A., University of California; Graduate Studies, Northwestern University and Harvard University.

SARA R. STIRLING (Miss), English; A.B., Ball State Teachers College; M.S., Indiana University.

Third Row:

DOROTHY RIDGEWAY (Miss), Mathematics; A.B., Indiana University; M.A., University of Michigan.

DORIS SHEPHERDSON (Mrs.), Mathematics; A.B., Huntington College.

F A C U L T Y

First Row:

JOHN KENNEDY, Chemical Engineering; Indiana University; Chemical Lab. Technician, St. Joseph Hospital.

LEE F. BERNHARDT, Engineering Drawing; P.E., (Mechanical and Electrical Engineering). Consulting Engineer; formerly Supervisor of Design, General Electric Company, Supercharger Division.

Second Row:

WILLIAM DANFORD, Engineering Drawing; Design Draftsman, General Electric Company.

RAYMOND S. BEIGHTS, Glee Club Director; B.M. and M.M., Indiana University.

Third Row:

GEORGE E. FRUECHTENICHT, Engineering Law; B.A., DePauw University; J.D., Northwestern University Law School; Attorney-at-Law.

EDWIN J. GRAHAM, Industrial Management; Industrial Consultant; formerly Staff Assistant to the Manager, General Electric Company, Fort Wayne Branch.

Fourth Row:

MICHAEL BATZ, Chemical Engineering; B.S.Ch.e., Indiana Technical College, Chemical Engineer, Fort Wayne Filtration Plant.

ORA DAVIS, Mathematics; A.B., Ball State Teachers College; Graduate School, Arizona State College, M.A., University of Michigan.

JAMES BASNETT GUNRAJ
LUIS GUZMAN
CHARLES C. KALNIN
SOLOMON KRAMER

First Row:

JAMES B. ALVES, B.S.C.E.; Long Island, N.Y.; A.C.E., Treasurer; Varsity Tennis, Soccer.

DURWARD G. BRADLEY, B.S.M.E.; Lyles, Tennessee; Mechanical Club; Treasurer, Vice-Chairman, Chairman, Executive Committee; Student Council; Intramural Soft Ball, Basketball; Open House.

GERALD RICHARD BREMMER, B.S.M.E.; Grand Haven, Michigan; A.S.M.E.; S.A.E., President, Vice-President, Secretary, Treasurer; Student Council (3), Treasurer (1); Yearbook (2), Assistant Advertising Manager (1), Write-up Editor (1); Student Relations Committee.

CHARLES D. BRYANT, B.S.R.E. & B.S.E.E.; Summit Hill, Pennsylvania; Student Council (2); President's List (6).

Second Row:

LEON CIFUENTES, B.S.C.E.; Fort Wayne, Indiana; A.C.E.

HAROLD VERNON COFFMAN, B.S.Ae.E.; Bourbon, Missouri; I.A.S., Chairman; Sigma Phi Delta; Flying Club,

President; Student Council (4), President (1); Intramural Basketball, Bowling League, Treasurer (1); President's List (1).

BETHEL H. DAVIS, B.S. M.E.; Chauncey, Georgia; A.S.M.E.; Varsity Basketball.

PHILIP FINET, B.S.M.E.; Danville, Illinois; President's List (2).

Third Row:

JAMES BASNETT GUNRAJ, B.S.C.E.; Br. Guiana, S.A.; A.C.E.; Cosmopolitan Club, Secretary; Alternate Student Council; Lawn Tennis; President's list (5).

LUIS GUZMAN, B.S.Ch.E.; Colombia, S.A.; A.C.S.; Phi Iota Alpha; Ch. Epsilon Tau; Honor Roll.

CHARLES C. KALNIN, B.S.C.E.; Chicago, Ill.; A.C.E.; Varsity Soccer; President's List (3); Honor Roll.

SOLOMON KRAMER, B.S.C.E.; Elizabeth, N.J.; A.C.E., Vice-President (1), Secretary (1); Flying Club; Student Council, Vice-President (1); Bowling Team and Rifle Team.

First Row:

ENRIQUE LUNA, B.S.C.E.; Colombia, S.A.; A.C.E.

VERNIS H. MEYER, B.S.M.E.; Baileyville, Kansas; Executive Committee, (1) A.S.M.E.; Vice-President Junior Class; Student Council, Secretary; Open House.

JACK MITCHELL, B.S.M.E.; Letts, Iowa; Kappa Sigma Kappa; Inter Frat Council, Secretary, Treasurer; Varsity Basketball.

MAHMOOD MOHSEM, B.S.C.E.; Fort Wayne, Indiana; A.C.E.; President's List (3).

Second Row:

DONALD J. NUNAMAKER, B.S.C.E.; Osterburg, Pennsylvania; A.C.E., Secretary (1), Treasurer (1); Varsity Baseball (2); Fencing Team; President's List (2).

RAFAEL PIZARRO, B.S.C.E.; Cali, Colombia, S.A.; A.C.E.

WAYNE SCOTT RIAL, B.S.R.E.; Batavia, N. Y.; S.A.R.E.; President's List (1).

ANATOL RYCHALSKI, B.S.C.E.; Chicago, Ill.; A.C.E.; Caswell Engineering Drawing Award.

Third Row:

WILLIAM SALSURY, B.S.M.E.; Caseyville, Ill.; President's List (4); Student Instructor, Phy 31A (6), Phy 21A (2), ED 11 (1); Open House (1).

LLOYD SELLERS, B.S.R.E.; Lancaster, Pennsylvania; Kappa Sigma Kappa; Sgt. At Arms, Secretary; Inter Frat Council, Treasurer, Secretary; Manager of Softball Team.

NICHELAS SZABAT, B.S.E.E.; Hartford, Connecticut; Alpha Gamma Upsilon, President, Secretary, Pledgemaster; Technician Staff, Sport's Editor, Reporter, Cartoonist; Intramural Bowling, Softball, Swimming, Basketball; Inter Frat Softball.

LEONG WUN, B.S.R.E.; Manteca, California; S.A.R.E. (4).

DEPARTMENTS

AERONAUTICAL DEPARTMENT

BENJAMIN L. DOW

BENNETT I. KEMP

BENJAMIN L. DOW, Chairman Department of Aeronautical Engineering; B.S.Ae.E., Virginia Polytechnic Institute; Graduate Student, Johns Hopkins University; Jet Propulsion Research, Glenn L. Martin Co.; M.S.Ae.E., University of Michigan.

BENNETT L. KEMP, Aeronautical Engineering, and in charge of Wind Tunnel; B.S.Ae.E.; Indiana Technical College, formerly flight research engineer, and in charge of wind tunnel of Sikorsky Aircraft Corp. Graduate study, University of Michigan.

Development of aircraft in speed and numerous designs in recent years has been amazing. The demand for men capable of designing and inspecting aircraft production is potentially unlimited. The well-trained Aeronautical Engineer may specialize in propeller design, airplane design, airplane production, airplane stress analysis, airport management, traffic management, and executive duties. The recent adoption by automotive manufacturers of streamline design emphasize the importance of the study of air currents and forces disclosed in wind-tunnel laboratory experiments.

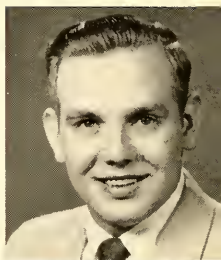

Wind Tunnel Propeller Adjustment

CHEMICAL DEPARTMENT

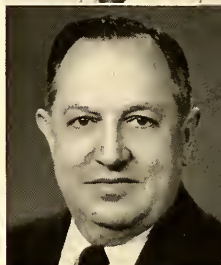

Chemistry lab experiment

ROBERT M. BISHOP

TOD R. DIXON

ROBERT M. BISHOP, Chemical Engineering; Wabash College; B.S.Ch.E., Indiana Technical College.

TOD B. DIXON, Chairman, Department of Chemical Engineering; B.S.Ch.E., M.S.Ch.E., and Ph.D.Ch.E., Ohio State University; formerly chairman of Chemical Engineering Department, Pratt Institute, Brooklyn, New York.

Because the applications of chemistry are so numerous and diversified, even the most casual examination will reveal the fact that virtually all industry in some stage of processing, development, or manufacturing, must depend directly on men with a knowledge of Chemistry. This has given rise to specialization in the field of Chemical Engineering, so that there are today highly specialized and diversified fields, such as Metallurgical Engineering, Gas Engineering, Petroleum Engineering, Ceramics Engineering, and various others. However, all of these fields are nothing more than offshoots from the parent, Chemical Engineering, which, therefore, still retains its major importance.

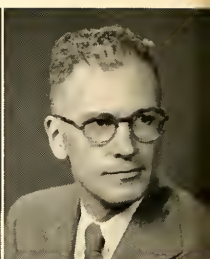

CIVIL ENGINEERING

WALDO E. ALBERT, JR.

ROBERT C. RUHL

WILLARD H. STEVENSON

WALDO E. ALBERT, JR., Aeronautical and Civil Engineering; Olivet College; B.S.Ae.E., B.S.C.E., Indiana Technical College; Engineer, Curtiss Wright Corporation; C.A.A. Primary, Secondary, and Instructors' Pilot Certificate; Rated Ground School Instructor.

ROBERT C. RUHL, Dean, Chairman, Department of Civil Engineering Chairman Academic Committee, B.S.C.E., M.S.C.E., Purdue University.

WILLARD H. STEVENSON, Civil Engineer, B.S.C.E., Purdue University; Graduate School, University of Illinois; formerly Design Engineer, American Steel Dredge; Consulting Engineer.

Civil Engineering is the oldest of the engineering professions, and may well be considered the parent of most of the other more or less specialized phases of Engineering Science. Egypt's pyramids; the Roman roads, bridges, and aqueducts; the channeling and dyke-building along China's Yellow River, are monuments to Civil Engineers who, thousands of years ago, pitted their skill against adverse Nature, overcoming her obstacles or holding in check her tremendous forces. Even as today the Civil Engineer builds our roads, so thorough the centuries, the profession of Civil Engineering prepared the figurative roads along which other branches of engineering have advanced.

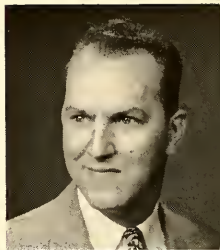

Surveyor's Accuracy in Construction

ELECTRICAL ENGINEERING

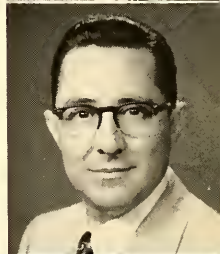

Electrical Mechanism of Clock being
repaired

RICHARD DERMER

EUGENE MONTOYA, JR.

MAURICE SIMMONS

RICHARD DERMER, Chairman, Department of Electrical Engineering; B.S.E.E., Indiana Technical College, formerly with General Electric Company in Testing and Experimental Laboratory.

EUGENE MONTOYA, JR., Electrical Engineering; B.S.E.E., Indiana Technical College; graduate studies, Illinois Institute of Technology and Purdue University; formerly Instructor U.S. Army and USAF.

MAURICE SIMMONS, Electrical Engineering; B.S.E.E., B.S.R.E., Indiana Technical College.

The Electrical Engineer must be familiar with his field, including the mechanical as well as the electrical aspects, whether he has to do with the housewife's electric iron or with the gigantic electric furnace. He must know how to select or how to design the correct motor in accordance with specific needs for power. He must have a practical as well as a theoretical knowledge and interest that will lead him to work out economics in powerhouse and production problems. His is the master mind in the field of communications. The modern automatic telephone with its instant accurate service is a monument to his inventive genius and painstaking skill.

MECHANICAL ENGINEERING

JOSEPH DORS

HOWARD A. MACKLIN

IVAN PLANCK

JOSEPH DORS, Mechanical Engineering; B.S.M.E., Indiana Technical College.

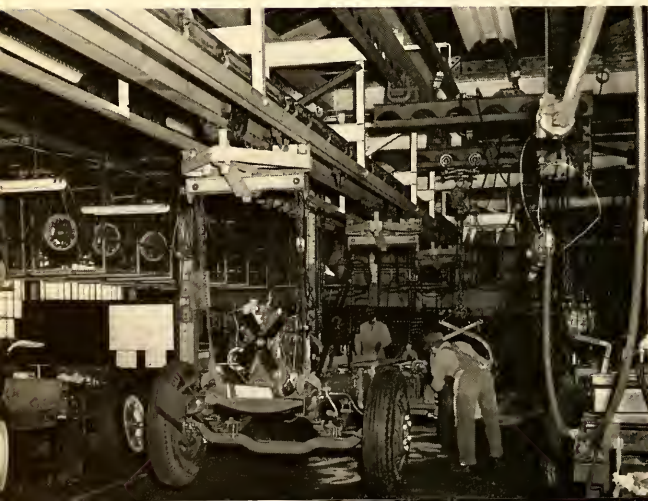

HOWARD A. MACKLIN, Mechanical Engineering; A.B., Huntington College; M.A. Ball State Teacher's College; B.S.M.E., Indiana Technical College; Graduate Work, Indiana University.

IVAN PLANCK, Chairman, Departments of Mechanical and Aeronautical Engineering; B.Ch.E., B.Sc. in Ed., Ph.D., Ohio State University.

The field of Mechanical Engineering embraces virtually every field of science and industry. Every manufactured article, no matter what its nature, requires the services of mechanical engineers both in the design of the machine on which it is made and in the operation of the factory itself.

This field of engineering is so broad that no man can be an authority on all its branches. Therefore, the student is given a thorough background in the basic sciences, from which he branches off into his special field.

Recognizing the need for good human relations in engineering, the Mechanical Department sponsors various organizations, such as the A.S.M.E. and S.A.E. These organizations, through their various field trips to industry, open house projects and social functions, teaches the student the importance of getting along with his fellow men.

Assembly line accuracy insures

RADIO ENGINEERING

Television tower transmitter skyline

HAROLD E. BAGGOTT

RALPH S. CARSON

ARTHUR B. PRICE

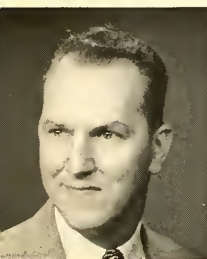

HAROLD E. BAGGOTT, Electrical and Radio Engineering; B.S.R.E., B.S.E.E., Indiana Technical College; formerly engineer, Magnavox Corporation.

RALPH S. CARSON, Chairman, Department of Radio Engineering; B.S.E.E., B.S.R.E., M.S.E.E., Major in Communications, University of Michigan; Engineer, formerly with Farnsworth Television and Radio Corporation; Advanced Study, Indiana University.

ARTHUR B. PRICE, Radio Engineering; B.S.E.E., B.S.R.E., Indiana Technical College.

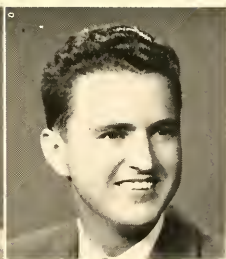

The ready transmission of sound and its reception has been a great boon to modern civilization and the Radio Engineer. Now the poor as well as the rich have the delights of the world's best music, entertainment and information at their own firesides. American homes contain millions of receiving sets. Continued improvement prompts constant replacement of these sets with others still more compact and efficient—more precise and accurate in operation. The advent of television has brought about radical changes in receiving sets and a complete revolution of structure and function of the entire network of broadcast stations.

The Student Branch of the Institute of Aeronautical Sciences had another busy year at Tech. To accomplish its purpose of promoting professional consciousness and fellowship, as well as enlighten the members of the work being done in the Aeronautical field, many movies were shown, a field trip was made to the NACA Propulsion Laboratory in Cleveland, Ohio, and numerous awards were given including a Lecture Award, and the Outstanding Student Award. The annual banquet topped off the year's activities.

Field trip along nickel plate railroad

Since its inception in 1941, the Association of Civil Engineers, formerly known as the Pyramid Club, has had for its goal the promotion of interest and study in all phases of the field of Civil Engineering. To attain this end, the Association strives to present a varied program to its members through the medium of motion pictures, field trips to local and distant construction projects and lectures by prominent civil engineers, many of whom are Tech. graduates.

One of the highlights of the activities of the past year was a field trip to the Nickel Plate Elevation project, during which the members had an excellent opportunity to learn many of the new innovations in the field of pre-cast and pre-stressed concrete.

Under the able sponsorship of Mr. Ruhl and Mr. Stevenson, the Association rounded out a successful year with the renewed hope of becoming a full-fledged student affiliate of the American Society of Civil Engineers.

A. C. E.

The Mechanical Club of Indiana Technical College is an affiliate of the Fort Wayne Branch of the American Society of Mechanical Engineers. The principal purpose of the Mechanical Club is to promote an interest in Mechanical Engineering. The plans of the club include social functions to increase fellowship and field trips to broaden our knowledge of engineering.

First hand advice from Dr. Planck

A. S. M. E.

K. A. R. C.

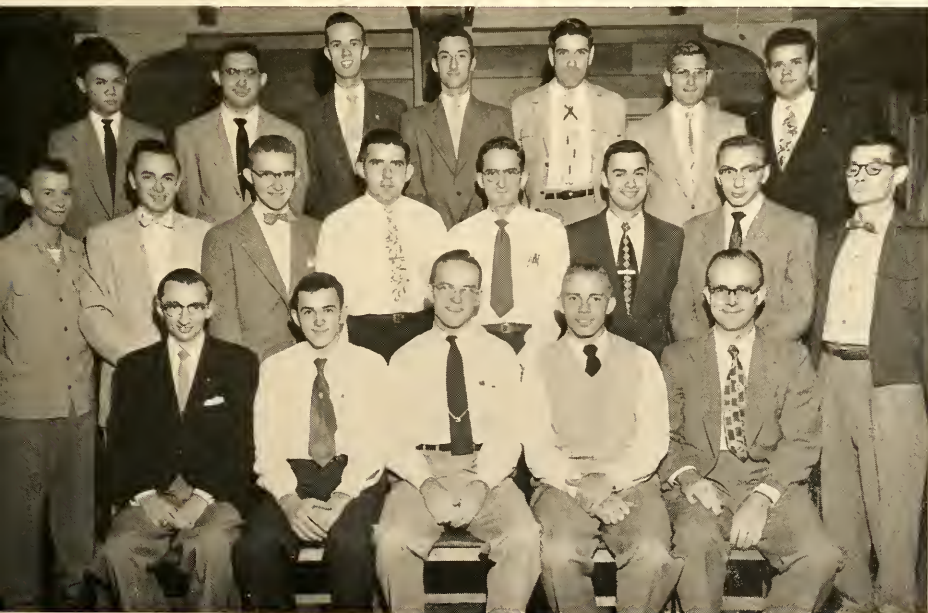

The purpose of Kekionga Amateur Radio Club is to promote amateur radio activities among the students of ITC showing interest in the practical applications of amateur radio communications, and to group these students together. K.A.R.C. is made up of members who are licensed by the Federal Communications Commission.

The club station W9BHR consists of a one kilowatt transmitter, Hq-129-X Hammerlund Receiver, a 220 megacycle transmitter and receiver, and a single-side-band exciter. The station operates on 80, 40, 20, and 10 meter amateur bands with either radio-telegraphy or radio-telephone. The equipment in the station was built by members of the club over the past years and now is operating efficiently.

Radio shack transmitter and crew

Iota Tau Kappa was organized to give recognition to superior scholarship. Upon invitation by the President of Indiana Technical College, students having completed four terms (not consecutive) college level with a point average of 3.5 or better for each of four terms, becomes eligible.

New Members of Iota Tau Kappa Left to right front sitting: Gregory Hyver, Roy Calcagno, and Joseph Cruse. Back, standing: Subhas Ghorai, and Glen Zimmerman.

IOTA TAU KAPPA

STUDENT COUNCIL

The Student Council is the official organization that represents the entire student body. The Student Council is made up of twenty members along with the Faculty Advisor. Sixteen of the members are regularly elected and serve for two terms. The remaining four members are the class presidents who serve for one term. An election is held at the end of each term at which time eight men are selected to serve.

Candidates for election are chosen by the students at a Departmental meeting held each term.

The main purpose of the Council is the welfare and interest of the student body. Any suggestions or criticism in regard to the student body should be directed to a member of the Student Council. Regular meetings of the Council are open to the students and minutes of the meetings are displayed in the lobby.

Officers and Spring term members

The seventh volume of the **KEKION-GAN** comes to you while looking into the future of your life and the world about you. It is the picture-story of the past year at Tech, memories which you will cherish and long remember.

Printed with more color, more true to

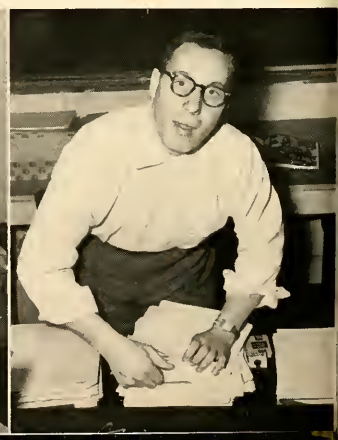

life action, and coverage for everyone, the time and effort necessary to prepare this book will never have been in vain.

Ideas may be good or bad, and opinions may differ, but accepting this year-book wholeheartedly will be our acclaim.

Practice to keep your guard up

The purpose of the Fencing Club is to further the interest of fencing. Both novices and advanced students of fencing are invited to join. Regular expert instruction is available and local matches are arranged.

FENCING CLUB

RIFLE CLUB

The Indiana Technical College Rifle Team is made up of members of the Rifle Club. During the past season, Ronald Hughes, Robert Leipold, Bruce Barkley, Marvin Clark, Gene Suter, Lars Wernholm, Henry Browning, Solomon Kramer, and Gregory Hyver participated as members of the team.

Through the medium of postal matches, where scores for shooting under similar conditions are exchanged by mail, the Tech Rifle Team competed with teams from the University of Illinois, University of Washington, University of Pennsylvania, University of Cincinnati, Illinois Institute of Technology, Ohio State University, and Indiana University. The Tech team did not score a single victory against this competition; but it must be borne in mind that each of these opponents was a team of R.O.T.C. men who have the best of equipment and mandatory practice.

Members of the Rifle Club also competed in the Allen County Rifle Association and scored two victories in ten matches against the crack rifle clubs of the area.

The Kemp Cannon Award, an annual award to the most valuable member of the Rifle Team, was won this year by Ronald Hughes.

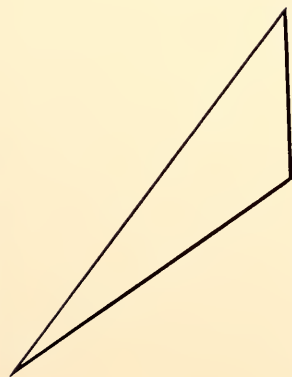

Prone position and sight alignment

First row, kneeling left to right: Wm. Warren Wright, Henry D. Browning, Nicholas Leal, Jr., James Poyer, Marvin Clark, Suk Kun Che. Standing, second row: Mr. John Whitney, Clarence Chipman, Lars W. Wernholm, William G. Densford, Bob L. Leopold, Robert J. Everitt, Bruce Barclay, Ronald D. Hughes, Harry Johnston, Ted Rowe, Robert L. Morris, Mr. B. L. Kemp.

Alpha Gamma Upsilon Fraternity, Beta Chapter, is part of a national social fraternity composed of men of all races and religions with the ability for mutual trust and loyalty. In an atmosphere of a home away from home, the fraternity provides a setting for the development of a well-rounded personality as well as scholastic growth. Through its many offices and activities the members are encouraged to develop leadership and responsibility so essential to our present day society. Last, but not least, the members leave the college rich in friends and fond memories of college life.

Where's the ball?

COACH MURRY MENDENHALL

The 1954-55 season was the most successful in the history of basketball at Indiana Technical College. The frequency of winning and improvement of attendance at the games testified to the success. Never before has a Tech team shown a record even close to the 13 won-6 loss record turned in by this team.

Coach Murray Mendenhall summed it up when he

A T I N D I A N A T E C H

said, "We have some good boys this year. The team is balanced, and they play as a team."

No opponent was able to beat the Tech Warriors more than once during the season. Tech, however, defeated two of its rivals twice during the season: Tri-State and Concordia. The Warriors had two winning streaks; the first was four in a row, and the second was six in a row.

Next year holds promise of another good season, as all the regulars of this season's team should be returning and playing together once again.

Kneeling, left to right: Phil Gustin, Max Baumgardner, Boyd Byerly, Keith Mendenhall. Second row: Dale Graft, Graydon Wifmer, James Keyes, Thomas Gillie, Donald Rudolph, Donald Bode, Samuel Lewis.

The Bulging Boiler

T H E B A T T L E O F T H E

Opening Jump up

The Bulging Boiler, presented by Dr. Planck in 1949, has been symbolic of the basketball rivalry between Tri-State College and Tech. By winning the 1949 game, Tech had possession of the Boiler for one year, after which Tri-State took it to Angola and retained possession for four years.

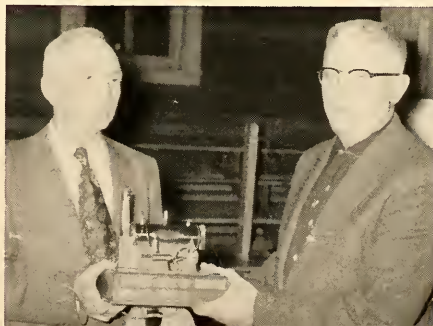

Will it come through?

B U L G I N G B O I L E R

The battle for the Bulging Boiler this year took place at Angola on February 8th. After playing on even terms the first half, the Warriors fell behind 11 points in the third quarter before rallying to tie the score at 83-83 at the end of regulation time.

The excitement was climaxed when in overtime the Warriors scored six consecutive points and held Tri-State to four points the remaining minutes to win 89 to 87 and bring the Boiler back home.

Coach Mendenhall Receives the Boiler

G O L F

Tech's golf team was well-represented during the '55 season under the coaching of Prof. Ben Dow. The only match lost was the first one of the season to Taylor University on their home course at Upland, Indiana. The return match, however, resulted in a victory for the Tech swingers. Competition was keen for the first five po-

sitions on the team. The number one position was filled by Dick Crider who also did a fine job as team captain. Dick will be back for another season next year as well as Howard Hall, Clyde Johnson, Bob Wright, Pete Chang, and Bill Crouch. V. G. Vaden did a fine job in playing number two position, and his graduation will be a big loss to the team.

Dick Crider, Captain

COACH MENDENHALL

The Tech baseball team this year turned in a record of more wins than losses—the first this has been done for several seasons. Some timely hitting and good clutch pitching were responsible for the team's success. The Defiance College team was the only one which could defeat the Warriors twice.

I N T R A M U R A L

Over eighty students participated in the intramural basketball program directed by Mr. Baggot. Each department of the college was represented by a team in the season's play.

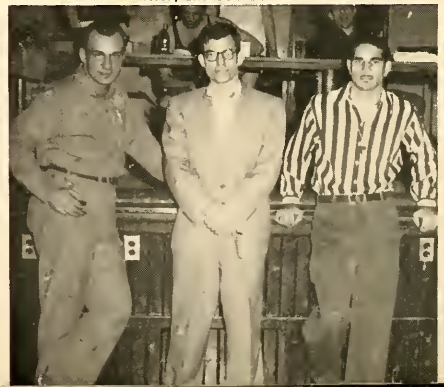

The Electrical Department team won the first half of the league schedule and were undefeated in so doing. The Aeronautical Department team duplicated this feat to win the second half as the Electricals lost only one game—that, of course, to the Aeros.

In the play-off game for the school championship, the Aero team convincingly defeated the Electrical team by a score of 34 to 21.

Seasholtz blocks & fouls

B O W L I N G

The Bowling Club during the past year sponsored a 14-team, American Bowling Congress sanctioned, league. This is the largest number of teams the league has had since bowling became an intramural sport at Tech.

Kappa Sigma Phi team won the first half championship, and Radio team won the second half championship. With an overwhelming score of 2792 to 2516, including handicap, Kappa Sigma Phi won the school championship.

At the end of season party, the following awards were made:

Members of the winning team received the school intramural award, A. B. C. championship award, and club trophies.

First, second, and third high average trophies to James Craven, David Craven, and Edward Klodzen, respectively.

First, second, and third high triple awards to Mr. Joseph Dors, Robert Nishida, and Robert Masson, respectively.

First row, seated left to right: John W. Bolam, David E. Craven, Russell S. Smith, Mr. Robert R. Marshall, Marion B. Stults, James K. Spiller. Second row, standing: Donald Rogers, Earl Ogawa, James Takakura, Dan Bilodeau, Bernard E. Heyl, Eduardo A. Mellado, C. K. Mathew. Third row, standing: Tom Kitano, Yasutoshi Takushi, Carrel R. Marshall, Wayne Hogg, Enrique J. Padilla, Ruben Trujillo. Fourth row, standing: Jack Shumsky, Robert H. Masson, Charles S. Szill, D. R. Drung, L. M. Iacona, F. J. Klodeen, James H. Torbett.

Russell Smith and WHAT FORM

Most Improved Bowler, James Spitler

First, second, and third high single game trophies to Charles Szili, Robert Borne, and Robert Nishida, respectively.

Most strikes trophy to James Craven.

Most spares trophy to Richard Mann.

Most splits made trophy to Edward Klodzen and Marion Stults, tied.

Most splits award to James Takakura.

Most gutter balls trophy to Earl Ogawa; second consecutive year!

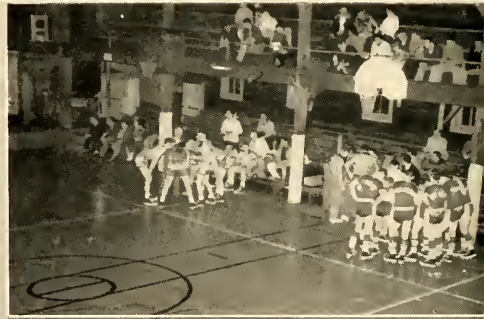

Most improved bowler, A. B. C. Achievement Award, to James Spitler.

Past-Presidents' (of Bowling Club) Sportsmanship Trophy to Joseph Cruse.

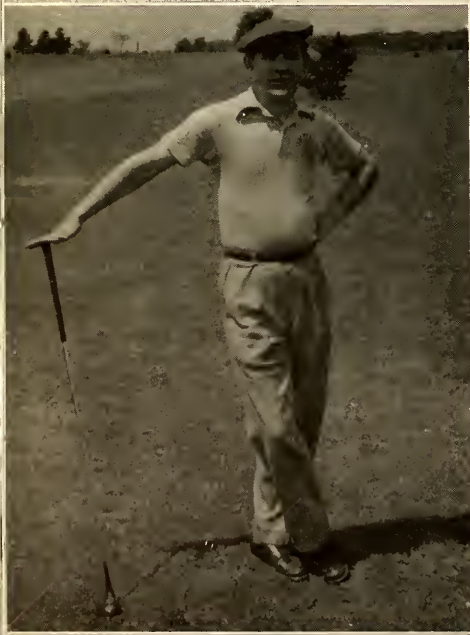

Perfect attendance awards to Joseph Cruse, Joseph Oddo, Richard Mann, Mr. Joseph Dors, Robert Nishida, Earl Ogawa, William Tummey, James Craven, Willard Cunningham, Walter Jankowski, Orville Kyler, and Marion Stults.

Your Move!!

An open door leading here. Another leading there. Hundreds of doors, in fact! It's the open door policy all right, and red carpets are being rolled out for graduate engineers all over the land. Which door to choose? That's the important question. Which carpet is the magic carpet, the one that will lead straight up the stairway of success? Well, it's your move. Make the right move and you're on your way without any delay. Make a wrong move, however, and you may find yourself walking through a door that opens into endless corridors of time. You know this. So does everyone else. Life is like that. Like a gigantic chess game for keeps, so it seems at times. There are moves and counter moves. The smartest move wins. It's your move now! Getting back to carpets, we don't happen to have a red one at Scintilla—but we do have a big welcome mat. And if you are interested in "modern flying carpets," our engineers design the world's most trusted aircraft ignition products—as well as a complete product line for marine, industrial, commercial, railroad, and automotive ignition applications.

Scintilla Division • Bendix Aviation Corporation • Sidney, N. Y.

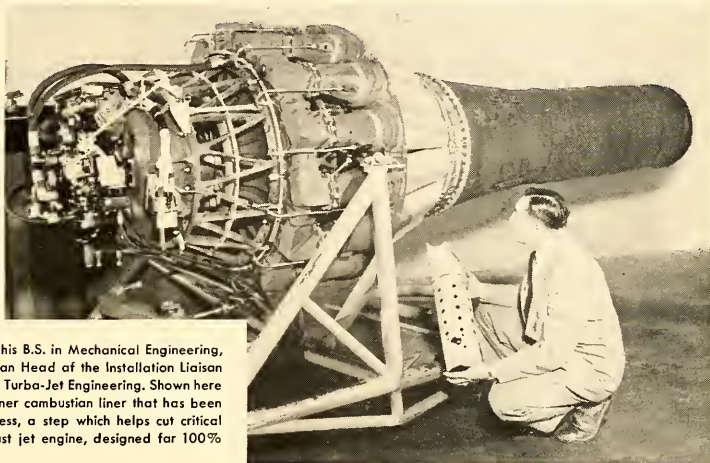

ALLISON

Engineers Pioneer

MISSILE

Power Plant Development

W. S. "Gus" Braffitt, who received his B.S. in Mechanical Engineering, U. of Kentucky in 1938, is now Section Head of the Installation Liaison and Engineering group of the Allison Turbo-Jet Engineering. Shown here by a J33-A-37, he is holding an inner combustion liner that has been through the aluminum dipping process, a step which helps cut critical materials in this high speed, low cost jet engine, designed for 100% reliability.

● The Allison jet powered USAF B-61 Martin Matador is the country's first operational ground-to-ground pilotless bomber. And, it's the first such missile to be sent overseas for duty.

The B-61 engine—an Allison J33-A-37—is based on the proven Allison centrifugal flow engine. This engine has accumulated more than $2\frac{1}{2}$ million hours of flight in such aircraft as the Lockheed F-80 Shooting Star, the T-33 Trainer, F-94 Night Fighter, and in the Grumman F9F Panthers and the Cougars!

In 1950, Allison undertook the project of engineering and developing a 5-hour, low-cost, expendable jet engine for the Glenn L. Martin Co. which was under contract with the Air Force. The missile assignment made it necessary for Allison to design a J33 model—incorporating reduced material, manufacturing and testing costs—and still maintain a 100% reliability.

The concentrated efforts of Allison engineers resulted in an 85% reduction of critical materials in missile engines in comparison with the similar centrifugal flow engines built for piloted aircraft.

An aluminum dipping process, developed by Allison engineers—in cooperation with General Motors Research—helped materially in reduction of critical materials. This process was used on inner combustion liners and permits using a low alloy steel in place of highly critical material. The aluminum dipping process affords corrosion protection, and still enables the liners to withstand high combustion temperatures. First to use aluminum dipping equipment on large parts, Allison now uses the process on turbine engines scheduled for piloted aircraft.

The missile power plant project is another example of the variety of problems handled by Allison engineering. Because Allison is continually doing pioneer work in advanced engineering developments, we need more technically trained men, especially young graduate engineers. Want to know more about your engineering future at Allison? Write now for information:

Farnsworth

IS FORMING THE FUTURE

The Farnsworth Electronics Company, newest Division of the International Telephone & Telegraph Corporation, has been organized for concentrated and integrated effort extending from research and development through design and manufacture in the vast fields of defense and industrial electronics.

While new in conception and objective, the company carries on an unbroken tradition of proud achievement reaching back to electronics infancy. The genius that created pulse techniques, electron optics, and photo multipliers, that raised wave-shaping and band-forming to a science, continues to lead an increasing effort to advance the frontiers of the art in missile guidance systems, microwave systems, antennas, radar systems, instrumentation, ECM, test equipment, display devices in both the visible and invisible spectrum, servo systems, industrial television, data recording, semi-conductors and information theory.

Here at Farnsworth we are expanding to assert our leadership in this dawning age of science and engineering. Our objective is pre-eminence . . . our foundation is established stability . . . our means is solid professionalism. To those who would lead tomorrow, we extend an invitation to join us today.

Take The Right Step Toward a GOOD FUTURE

The engineer who joins International Harvester joins a sound, long-established but progressive company—that represents opportunity for advancement. Harvester has long been associated with leadership in new and improved products that increase agricultural productivity; result in better transportation, assist in construction and the handling of heavy materials; protect and preserve food through refrigeration.

IH needs mechanical, industrial, metallurgical, chemical, agricultural, and electrical engineers. IH is looking for engineers for training programs, for product design, for tests and developments, for research and experimentation in nearly all its divisions.

... and adds a thought or two!

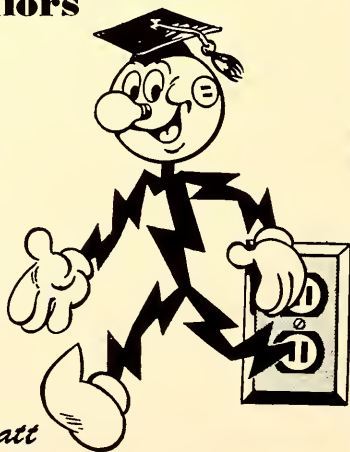

"Congratulations, you graduates. You're moving up in the world. So, good luck in whatever's ahead.

"But say, before you leave, let's think a bit about the past few years. How about those favorite classes, friends and all the fun? Hasn't it been great!

"And you know what? It could only happen here. Yes, free, fine education is part of the good ole U.S.A.

"Don't forget it when you've become a solid citizen with a family and all. 'Cause you'll need to remember ... to beat the guys who'll want a change.

"Democracy's best of all!"

Reddy Kilowatt
YOUR ELECTRIC SERVANT

INDIANA & MICHIGAN
ELECTRIC COMPANY

It's great to live in Fort Wayne

In Fort Wayne the citizens enjoy the advantages of owning their own municipal utilities, receiving unexcelled service at very low cost.

CITY LIGHT AND WATER PLANT

Besides offering low cost utility service, City Light contributes \$225,000 annually in free lighting for your streets, alleys, parks, and playgrounds . . . a saving of a quarter of a million dollars to the taxpayers. Patronize City Light . . . your company.
